# INTRODUCTION

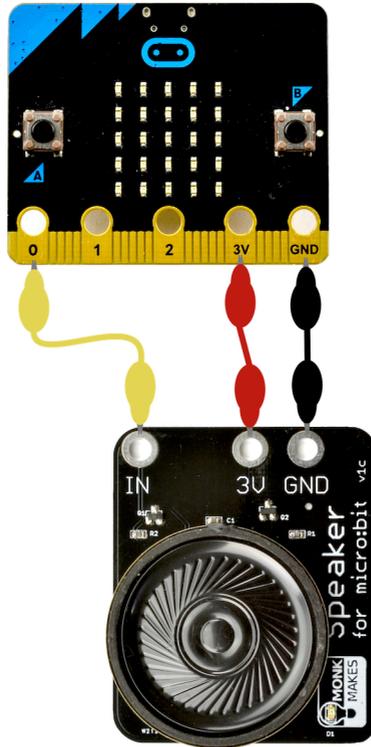

The MonkMakes Speaker for micro:bit is a neat little amplified speaker that connects to your micro:bit using alligator clips. Despite its small size, this speaker is pretty loud.

- Amplified output
- LED 'power on' indicator
- Reverse polarity protection

## CONNECTING YOUR SPEAKER

Connect the Speaker to the micro:bit as shown below. When attaching the alligator clips to the micro:bit, make sure that the clips are perpendicular to the board so that they are not touching any of the neighbouring connectors on the micro:bit edge connector.

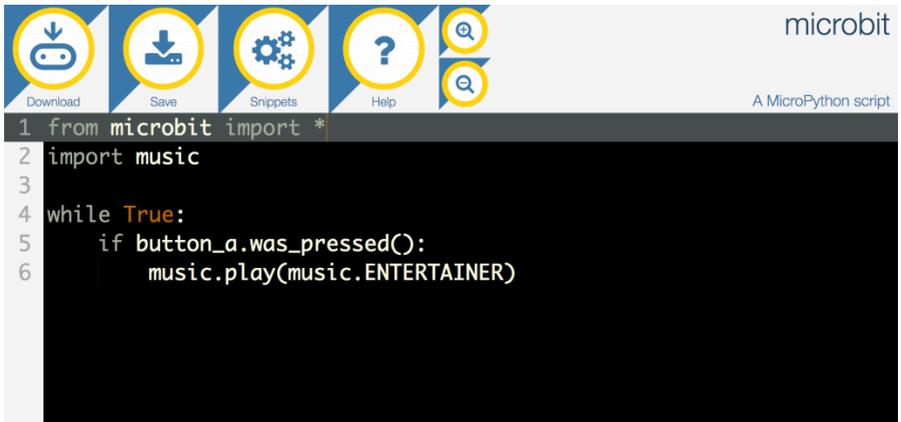

## MAKECODE BLOCKS EXAMPLE

The following blocks program will play the 'Entertainer' melody whenever button A is pressed.
